

The new Dentrix virtual workshops provide you with the benefits of a live, trainer-led class without the time and expense of travel. You'll get live feature demonstrations, hands-on practice time, and a workbook with step-by-step instructions. Best of all, you can attend a virtual workshop at a time and place that fit your schedule—all you need is two hours, a phone, and a computer with an internet connection.

Practice Success

CREATING A COMPREHENSIVE PATIENT HEALTH HISTORY

It's more than just a patient's dental health.

Dentrix G7 introduced the Health History module. Learn the ins and outs of this module and discover how to use it to document your patients' medical conditions, allergies, and current medications along with their physician, preferred pharmacy, and emergency contact information. Get tips about when and how to set up Health History alerts to notify team members about medical conditions and ensure your patients receive the best care.

This workshop is a live, online class with hands-on practice and optional lab time. Attend this class if you want to get a better understanding of how to use the new Health History module to document and maintain a full picture of patient health history in Dentrix. You will receive an email with the class workbook and links to join the workshop after you register.

LENGTH: 2 HOURS + OPTIONAL 1 HOUR OF LAB TIME | PRICE: \$149 | CLASS SIZE: MAX 10

WHAT YOU'LL LEARN

ASSIGNING PATIENT HEALTH HISTORY

You patient's health is important, and it's equally important to be able to access a patient's complete health history within Dentrix. Learn how to add items to a patient's health history and how to edit, inactivate, and delete health history items currently assigned to them. Keep your records up to date with new options to record emergency contact, physician, and pharmacy info. Learn how to update health history items using patient responses in online forms.

CUSTOMIZING THE HEALTH HISTORY MODULE

One way to ensure your staff uses the Health History module effectively is to set it up in a way that makes sense for your practice. Get recommendation for how to organize your health history items, including separating your old medical alerts into categories for medical conditions, allergies, and medications. Learn how to add, edit, and inactivate health history items in your database as needed. Learn how to search your database for patients assigned specific health history items and delete those items you don't want assigned again by mistake.

WHO SHOULD ATTEND

This online workshop is for you if you:

- Are a Dentrix user responsible for entering or maintaining patient information
- Provide treatment or patient care
- Need an understanding of how the Health History module works
- Need to update or organize health history item categories
- Want hands-on training in a virtual classroom with a certified Dentrix trainer
- Need an opportunity to build your Dentrix skills without traveling to a class

TOPICS AT A GLANCE

- Adding items a patient's health history
- Editing, inactivating, and deleting items assigned to a patient
- Updating a patient's health history with Questionnaire responses
- Separating health history items into categories
- Finding health history items assigned to patients
