Dentrix Learning Edition

System Requirements

Dentrix Learning Edition System Requirements

It is important for you to verify that your computer meets the current system requirements before you install the Dentrix Learning Edition. The System Requirements are listed below.

The System Requirements describe the minimum standards for using the Learning Edition. Exceeding the minimum standards may result in better system performance.

Hardware Requirements

- Intel Pentium® IV 2.4 GHz
- 1 GB RAM
- 3 GB available disk space
- DVD drive

Supported Operating Systems:

- Windows® XP Professional*
- Windows® XP Tablet PC Edition
- Windows® Vista Business
- Windows® Vista Ultimate
- Windows® 7 Professional
- Windows® 7 Ultimate
- Windows® 8
- Windows® 8.1

Additional Operating System Information

The Dentrix Learning Edition has not been tested on the Windows® XP Home, Windows® Vista Home, and Windows® 7 Home edition operating systems. However, the Home editions share much in common with the other supported operating systems, and many learners have installed the Learning Edition on the Home edition and have not reported any errors.

Windows 7, Windows 8 and 64-bit operating systems are only supported on version G4.8 of the Dentrix Learning Edition. To see which version of the Learning Edition you have, look at the front of the disc. If it says "Version G4.8" you have the version that is compatible with Windows 7 or Windows 8 and 64-bit operating systems.

* Windows XP is no longer supported by Microsoft but the Learning Edition should still work with it.
